PROFILE

Full-Stack Developer and Professional Services Consultant who architects and ships production systems end-to-end, from system design through deployment. Specialized in SaaS platforms, lead-generation marketplaces, POS systems, and process automation, with delivered solutions now running across **30+ US locations** and processing **thousands of leads daily**. Backed by **4+ years of client-facing B2B experience**, pairing strong technical execution with the communication and stakeholder skills to turn business requirements into scalable, reliable solutions.

EXPERIENCE

Associate Professional Services Consultant ·

Mar 2026 – Present

Kaseya

- Lead end-to-end client implementations on Kaseya's IT management platform, which powers a global network of MSPs.
- Scope requirements with stakeholders and configure the platform across the full Kaseya stack.
- Build the integrations that wire the platform into customers' existing systems, and run hands-on enablement for their teams.

Stack: [Kaseya](#) · [IT Automation](#) · [Integrations](#) · [SQL](#) · [PowerShell](#)

Full-Stack Developer · [Geeks5G Marketing Agency](#)

Jan 2025 – 2026

- Led end-to-end development of full-stack platforms and client dashboards, covering system architecture, development, deployment, and maintenance.
- Coordinated development teams by defining timelines, assigning tasks, and ensuring high-quality, on-time delivery.
- Collaborated directly with clients to gather requirements and design scalable, business-aligned solutions.
- Built custom automations and data pipelines to improve operational efficiency and marketing performance.

Stack: [Next.js](#) · [Node.js](#) · [Python](#) · [PostgreSQL](#) · [AWS](#) · [Stripe](#) · [AI](#)

Full-Stack Developer · [Law Firm](#)

2026 · 3 mos

- Built a document automation platform that replaced the firm's manual drafting process.
- Designed a flow where clients submit structured forms and the system produces ready-to-review legal documents on submission, saving hours per case.

Stack: [Node.js](#) · [Python](#) · [Templating](#) · [Forms](#)

Full-Stack Developer · [Hammercrest](#)

2026

- Designed and built the public site for a property maintenance and contracting service across Toronto and the GTA.
- Structured seven trades under a single brand with a four-step path, routing every CTA to WhatsApp for same-day quotes.

OTHER EXPERIENCE

Bilingual Customer Service Representative ·

May 2023 – Feb 2025

Solvo Global

Bilingual support for Spirit Airlines: manual bookings, flight changes, cancellations, and refunds across chat and internal systems. Supported and helped lead service teams, ensuring KPI compliance and efficient resolution of complex cases.

SPECIALTIES

SaaS platforms · POS systems · Process automation · Lead generation · Multi-tenant architecture · AI integrations

Bilingual Executive Assistant · IGT Solutions

[Jul 2022](#) – [Apr 2023](#)

Managed business travel for TravelPerk, handling flights, hotels, transfers, and meeting rooms via Amadeus GDS, NDCs, and supplier platforms, coordinating directly with suppliers to confirm and adjust bookings.

Bilingual Customer Service Representative · Almacontact

[Dec 2021](#) – [Jul 2022](#)

Supported LATAM Airlines with flight bookings, baggage claims, changes, and cancellations using Sabre GDS, Sabre Red 360, and Zendesk.

SELECTED WORK

ProAxis · 2025

White-label SaaS for launching digital marketing agencies. Multi-tenant architecture with a built-in CRM, training academy, drag-and-drop form builder, Stripe Connected Accounts, calendars with auto-generated Zoom links, and a partner commission engine.

Stack: [Next.js](#) · [Node.js](#) · [PostgreSQL](#) · [Stripe Connect](#) · [AWS](#)

Spa Management & POS · 2025

Full operations and POS system running across **30+ US spa locations**. Inventory, pricing management, checkout, discount logic, multi-location sales tracking, and HR automation, in active daily use.

Stack: [Next.js](#) · [Node.js](#) · [PostgreSQL](#) · [MySQL](#) · [Docker](#)

VerifyLead · 2025

Platform processing **thousands of leads daily**. Real-time SMTP validation to protect sender domain reputation, paired with email + SMS campaigns, OTP-verified embeddable forms, and intelligent lead scoring.

Stack: [Node.js](#) · [PostgreSQL](#) · [SMTP](#) · [Twilio](#) · [SendGrid](#)

ELC: Call Exchange System · 2025

A call exchange system powering a real-time leads marketplace. Connects buyers and sellers through live routing and matching, plus the operational layer required to run a marketplace at scale.

Stack: [Node.js](#) · [PostgreSQL](#) · [Real-time](#) · [Marketplace](#)

Real-time Microtrade Bot · 2024

Python trading bot executing microtrade strategies on real-time tick data across **20+ symbols**. Live ticks via Alpaca, historical via EODHD. Strategy logic optimized to extract revenue from short-window price movement.

Stack: [Python](#) · [Alpaca](#) · [EODHD](#) · [Real-time](#)

Legal Document Automation · 2024

Document automation for a law firm. Form submissions are mapped and converted into completed legal documents, replacing manual paralegal drafting with a self-serve flow that produces ready-to-review documents on submission.

Stack: [Node.js](#) · [Python](#) · [Templating](#) · [Forms](#)

Galaxy Generator · 2024

Generative galaxies built with Three.js and custom GLSL shaders, rendered in real time in the browser.

Stack: [Three.js](#) · [GLSL](#) · [WebGL](#)

Portal Entry · 2024

A 3D gallery you can navigate directly in the browser, built with Blender and Three.js.

Stack: [Three.js](#) · [Blender](#) · [WebGL](#)
